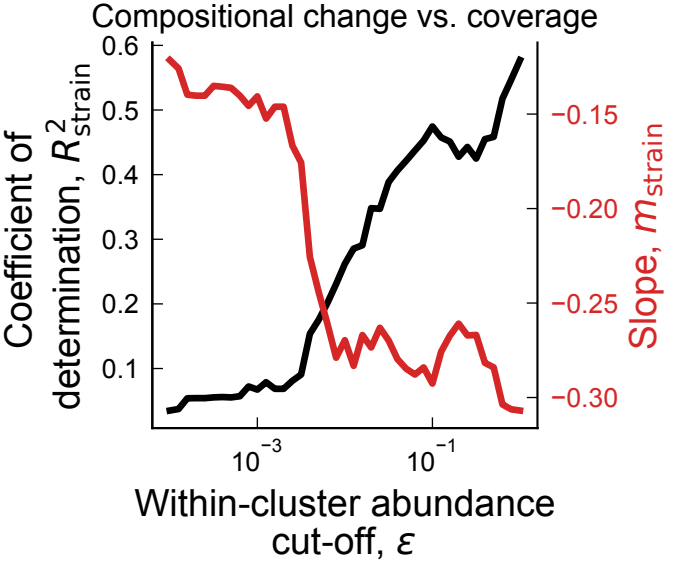
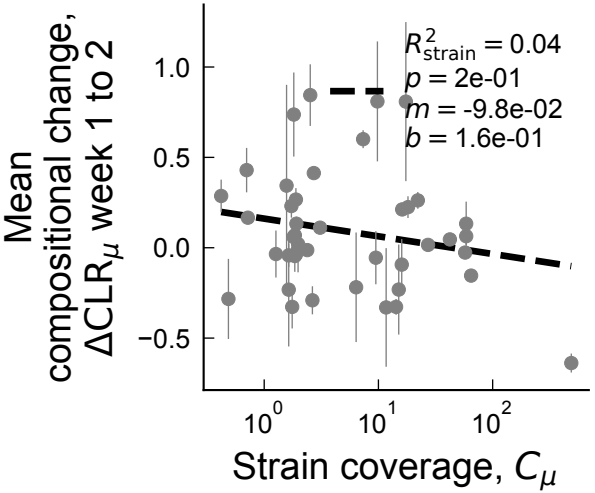
Compositional change, ΔCLR$_\mu$ week 1 to 2
R^2_{strain} = 0.02,
p = 3e-02
Strain coverage, C_μ



Compositional change vs. coverage
Coefficient of determination, R^2_{strain}
Slope, m_{strain}
Within-cluster abundance cut-off, ε



Mean compositional change, ΔCLR$_\mu$ week 1 to 2
R^2_{strain} = 0.04
p = 2e-01
m = -9.8e-02
b = 1.6e-01
Strain coverage, C_μ
